WORK EXPERIENCE

iOS Developer - Apple Developer Academy@BINUS

February 2020 - December 2020

During my time at Apple Developer Academy@BINUS, I have developed 4 apps and 1 made it to the App Store. Experienced being a product manager, software engineer, and UI/UX Developer during my 4 projects here. Worked in a team of 5-6 in each project. Familiar with Swift, CoreData, CloudKit, and RxSwift

Front-End Web Developer - Jasasistem

January 2020 - August 2020

As a front-end web developer, I was tasked to create a payroll system and manage front-end side of a makeup marketplace website. Worked in a team of 3-7, using React.js and Angular as the main language in development. Aside from managing the front-end and creating a payroll system, there are SPA website that was given by the company for my team to develop.

Analysis of Algorithm Teaching Assistant - BINUS International University

July 2019 - November 2019

As a teaching assistant, I was tasked to explain algorithms for second year students at BINUS International University. The syllabus include code complexity, divide & conquer algorithm, sorting algorithms, greedy, dynamic programming, Knapsack problem. I work closely with the professor and helped the students during their second year.

Java Programming Language Teaching Assistant - BINUS International University

February 2019 - June 2019

As a teaching assistant, I was tasked to explain the basic of Object-Oriented Programming using Java for first year students. I taught my student basic on Java, database management using SQL using Java, creating UI in Java using JavaFX library.

EDUCATION

Computer Science - BINUS University International

August 2017 - Present

Student at BINUS University International taking Computer Science major, currently on my final year with 3.74 GPA. I've learned many programming language including Python, Java, C++. During my second and third year, I was appointed by my professors to work as their teaching assistant as mentioned above.

SMAK 1 BPK Penabur Bandung

July 2014 - June 2017

Took the STEM field and the Life Skill Program during my highschool. Took the computer science and illustration program on the Life Skill Program. I learned Java for the first time during this time and is on the top 10 of the class. On my final year, I developed a website with my friends that took medical program and created a website that shows diseases and its symptoms.
